Adrian-Ioan Barcutean

ID: RK198984 | **Work permit:** Romanian | **Date of birth:** 05/09/1977 |

Place of birth: Bucuresti, Romania | **Nationality:** Romanian | **Gender:** Male | **Phone number:** (+40) 723313296 (Home) | **Email address:** barcuteanadrianioan@gmail.com | **Website:** https://ro.linkedin.com/in/barcutean-adrian-840b6711 |

Address: Strada Ion Urdareanu 2, P22, 050688, Bucuresti, Romania (Home)

ABOUT ME

Solution Architect & Product Owner with practical AI & LLM experience and senior-level expertise in architecting, designing, and optimizing complex enterprise information systems for large-scale public and private sector organizations, including Documenta DMS and Vogo Family. Extensive background in end-to-end solution design, system architecture governance, and enterprise-level digital transformation initiatives.

Demonstrated expertise in enterprise web and mobile platforms leveraging relational databases (Oracle, MS SQL, MySQL), multiple programming languages, and structured modeling frameworks such as TOGAF, UML (Use Case, Class, Sequence, Activity, Component, Deployment), BPMN, ERD, SWOT analysis, Service-Oriented Architecture (SOA), and Microservices Architecture. Proficient in tools including Lucidchart, ArchiMate, Sparx Systems Enterprise Architect, Visio, Draw.io, Postman, and Swagger. **Artificial Intelligence & LLM Engineering: OpenAI (GPT/Codex), Google Gemini, Anthropic Claude, Groq, Rasa (Conversational AI), Vosk (Speech Recognition), GitHub Copilot**

Strong experience in international and multicultural environments, ensuring compliance with EU technical and regulatory standards.

Organize and coordinate QA and security validation sessions, including structured penetration testing activities (Scanning & Enumeration, Vulnerability Analysis, Risk Classification, and remediation planning).

Integrated enterprise-level project and program strategies into agile software development environments by acting as Product Owner, driving sprint execution, backlog governance, and continuous alignment between architecture vision, business capabilities, and delivery teams using Jira, Kanban frameworks, and KPI-based performance management (Scrum/Kanban, Jira, Monday.com, Rally Software).

WORK EXPERIENCE

PRODUCT OWNER & ENTERPRISE SOLUTION ARCHITECT – VOGO TECHNOLOGY - WWW.VOGO.ME – 10/2024 – Current – BUCHAREST, ROMANIA

Mobile Applications (iOS/Android), AI-Driven Digital Ecosystem

Acted as **Product Owner** and Enterprise Solution Architect within an agile software development environment, defining and executing the architectural vision of a multi-channel digital ecosystem integrating e-commerce, AI services, and mobile applications. **Artificial Intelligence & LLM Engineering: OpenAI (GPT/Codex), Google Gemini, Anthropic Claude, Groq, Rasa (Conversational AI), Vosk (Speech Recognition), GitHub Copilot**

Strategic Architecture & Vision (TOGAF-aligned approach)
Defined the multi-year architectural roadmap of the Vogo digital platform, ensuring alignment between business strategy, technical capabilities, and governance controls. Applied enterprise architecture principles inspired by TOGAF layers (Business, Application, Data, Technology) to structure capability mapping, service decomposition, and technology alignment.
Conducted architecture reviews, portfolio analysis, and maturity assessments to identify technical debt, scalability constraints, and compliance gaps. Ensured traceability between business drivers, user stories, and technical implementation.

Architecture Modeling & Design
Produced business and system architecture models using:

- **ArchiMate** (business capability mapping, application layering)

- **BPMN** (process modeling for e-commerce flows, order lifecycle, document workflows)
- **UML** (Use Case, Class, Sequence, Component, Deployment diagrams)
- CASE/modeling tools for system documentation and TDD alignment

Designed a modular architecture combining WooCommerce core, custom REST APIs, AI microservices, and mobile applications, with structured API governance and service abstraction layers.

Product Ownership in Agile Environment
Served as Product Owner within Scrum/Kanban teams using JIRA, with direct responsibility for:

- Backlog definition and prioritization
- User story modeling and acceptance criteria
- Sprint planning and execution governance
- Refactoring strategy and TDD alignment
- Cross-functional stakeholder alignment (business, developers, QA)

Integrated program strategy into sprint-level delivery using Jira and structured KPI-based tracking, ensuring continuous alignment between architectural objectives and incremental releases.

Secure Enterprise Architecture & Governance
Designed and governed a secure-by-design architecture including:

- Backend proxy isolation
- JWT-based authentication
- Role-based access control
- API lifecycle governance
- Audit logging & traceability mechanisms
- GDPR-aligned document management modules

Evaluated system vulnerabilities and coordinated QA/security validation sessions, including penetration testing and risk classification activities.

Technologies & Framework Exposure
Enterprise Architecture principles (TOGAF-inspired layering), ArchiMate, BPMN, UML, CASE tools
Relational databases (MySQL)
RESTful services, JWT security, AI integrations
Agile (Scrum/Kanban), TDD, Clean architecture design and Modular design from inception
Software maturity models (CMMI exposure)
Testable components, Code quality standards, CI/CD & code review governance and Design for scalability
Architected integration with AI engines (OpenAI, Groq, custom NLP modules) via a modular orchestration layer allowing controlled evolution

AI-Assisted Development: OpenAI Codex, Google Gemini AI (code generation and implementation support).
Efficient usage of AI-assisted development tools (OpenAI Codex, Google Gemini AI) to streamline coding tasks, support rapid prototyping, and reinforce testable, maintainable code delivery in an agile team environment.
Architected and governed the orchestration of distributed software bots across backend and frontend systems, implementing standardized communication interfaces and integration patterns to ensure secure, scalable, and interoperable operations.

PRODUCT OWNER & ENTERPRISE SOLUTION ARCHITECT – DOCUMENT MANAGEMENT SYSTEM & BPM – DOCUMENTA DMS – 01/2017 – 09/2024 – BUCHAREST, ROMANIA

Served as Product Owner and Enterprise Solution Architect for the Documenta DMS and BPM platform, directing architecture strategy, product governance, and secure enterprise deployments across banking, public administration, oil & gaz, energy, and retail sectors, supporting large-scale national and cross-border Documenta DMS implementations for ERSTE Asset Management, ERSTE-BCR Bank, First Bank, Idea Bank, UNILEVER, Rompetrol, OMV Petrom, MIPE, ANRE, Ministry of Justice, and CNPP.

Strategic Architecture & Vision (TOGAF-aligned approach)
Defined multi-year architectural roadmaps for banking DMS and regulatory workflow platforms, ensuring alignment between regulatory requirements, operational banking processes, and enterprise IT strategy.
Applied enterprise architecture principles inspired by TOGAF layers (Business, Application, Data, Technology) to structure document lifecycle management, approval workflows, regulatory governance, and secure integration with core banking systems.
Conducted architecture reviews, system portfolio assessments, and maturity evaluations to identify scalability constraints, compliance risks, and modernization opportunities (including legacy Documentum migration).
Ensured traceability between regulatory drivers, business requirements, user stories, and technical implementation.

Architecture Modeling & Design
Produced enterprise and system architecture models using:

- **ArchiMate** (application layering, capability mapping, system landscape modeling)

• **BPMN** (regulatory approval workflows, garnishment processing, document lifecycle automation)
• **UML** (Use Case, Sequence, Component, Deployment diagrams)
• CASE/modeling tools (Visio, ArchiMate tools) for structured system documentation
Designed secure, modular DMS architectures integrating:

- Electronic registry systems
- OCR-based document ingestion
- Multi-stage approval workflows (20–30 parallel reviewers, VP-level approval flows)
- Core banking system integrations
- SharePoint and enterprise collaboration platforms

Product Ownership in Agile Environment
Served as **Product Owner within Scrum/Kanban teams (JIRA-based governance)**, with direct responsibility for:
• Product vision and feature roadmap
• Backlog definition and prioritization aligned with regulatory deadlines
• User story modeling and acceptance criteria
• Sprint planning and release governance
• Coordination of compliance-driven feature delivery
• Continuous alignment between architecture, business units, and IT delivery teams

Secure Enterprise Architecture & Governance
Designed and governed secure-by-design banking architectures including:
• Role-based access control (RBAC)
• AD/LDAP integration
• Secure document handling and audit trails
• XML/XSD-based structured data exchange
• RESTful service integration
• Compliance-ready logging and traceability
Coordinated QA sessions, architecture validation reviews, and compliance checks to ensure resilience and operational integrity of mission-critical banking systems - ***including officialy acredited PenTest and security tests***

Implementation Oversight & Technical Breadth
Led full-scale DMS implementations and legacy system migrations (including EMC Documentum → Documenta DMS), ensuring zero data loss and minimal operational disruption.
Defined integration architecture between document workflows and core banking systems for real-time case management (e.g., garnishment processing, regulatory publication workflows).
Oversaw database architecture,performance optimization, secure web applications, and workflow engines ***in high-sensitivity financial environments.***

Technologies & Framework Exposure
Enterprise Architecture principles (TOGAF-aligned structuring)
ArchiMate, BPMN, UML, CASE tools (Visio, ArchiMate EA tools)
Oracle / MS SQL
RESTful services, XML/XSD
Secure web applications & RBAC
Agile (Scrum/Kanban), TDD-aligned delivery governance
Software maturity models (CMMI exposure)
Documentum migration & DMS enterprise platforms

ENTERPRISE ARCHITECT & TECHNICAL PROJECT MANAGER – VARIOUS NATIONAL AND INTERNATIONAL PROJECTS – ROMANIA, AUSTRIA, USA – 05/2001 – 05/2017

Delivered large-scale digital transformation programs across the banking, telecom, public administration, pensions, and energy sectors, acting in hybrid roles as **Enterprise Architect, Solution Architect, and Technical Project Manager**. Led the full lifecycle of enterprise applications, from requirements analysis and architecture design to implementation, integration, and compliance validation.

Key responsibilities and achievements:

- **Insurance & Finance**: Architected and delivered enterprise solutions including document management systems, regulatory compliance platforms, electronic registries, and archiving solutions integrated with core banking and ERP systems.
- **Telecom & Private Sector**: Implemented high-availability systems for **Vodafone Romania** and **inthinc USA**, covering collections management, fleet monitoring, and business analytics.
- **Government & Public Administration**: Coordinated enterprise-scale DMS and workflow projects for the **Romanian National House of Pensions (CNPP)**, supporting contributions and benefit calculations for over **10 million citizens**, and delivered document lifecycle solutions for ministries and regulatory authorities.

- **Oil & Gas / Industry**: Designed and rolled out workflow automation and archiving platforms for **Rompetrol (KMG International)** and **OMV Petrom**, including fleet management and invoice automation integrated with SAP.
- **Architecture & Technical Leadership**: Produced architecture blueprints, UML models, XML/XSD schemas, and technical specifications; enforced secure web standards, interoperability via REST/SOAP, and database governance (Oracle, MS SQL).
- **Team & Vendor Coordination**: Acted as technical coordinator and product owner, aligning IT teams, business stakeholders, and international vendors across Romania, Austria, Bulgaria, Serbia, and the US.
- **Compliance & Standards**: Ensured EU-aligned architectures, audit readiness, and secure implementations (GDPR, eIDAS, ISO standards).

Technologies & tools: Java (J2SE/J2EE), Oracle (OCP), MS SQL, Documenta BPM/DMS, SharePoint, UML, ArchiMate, REST APIs, OCR, RPA, GitHub, CI/CD, Agile, Kanban, CMMI.

EDUCATION AND TRAINING

10/09/1996 – 05/02/2001 Bucharest, Romania

BACHELOR'S DEGREE IN ECONOMIC CYBERNETICS, STATISTICS AND INFORMATICS - MASTER EQUIVALENT 5 YEARS EQF LEVEL 6 Academy of Economic Studies – Bucharest (Economic Cybernetics, Statistics, and Informatics)

Website https://ase.ro/ | **Level in EQF** EQF level 6

1992 – 1996 Fagaras, Romania

HIGH SCHOOL DIPLOMA IN INFORMATICS National College "Doamna Stanca" – Făgăraș
